

4/6/2026: FOR IMMEDIATE RELEASE

Norvell Township Requests Additional Information Regarding Proposed Mining Application

Norvell Township has formally requested additional information from American Aggregates of Michigan (AAOM) in connection with the company's pending conditional use and mining permit application.

The request is intended to ensure that the Planning Commission has a complete and accurate administrative record before evaluating the proposed mining operation under the Township's zoning ordinance and applicable Michigan law. The request incorporates questions and issues presented by members of the public during the application review process, along with other matters identified by the Township.

The request for supplemental information is a routine part of the review process for complex land use applications and does not reflect any determination regarding the merits of the proposal. No decision has been made on the application.

The Township will continue its review once the requested materials are received and made part of the record. Information regarding future meetings and opportunities for public participation will be posted on the Township's website and published in the manner required by law. For more information, please contact Norvell Township.
